

Established standards and low cost CD/DVD recorders and media are responsible for the success of CD/DVD recording technology. Burning CD/DVDs with a single recorder is time consuming, and changing media manually often is not acceptable. This situation requires recording systems to offer capabilities for automated CD/DVD duplication. For the strictly Duplication-Minded consumer, the Hera Series CD/DVD Duplicators offer a professional solution to satisfy those demands.

The Hera Duplicator is a fully automated CD/DVD Duplicator which does not require the use of an existing PC. The Hera series duplicators can be configured with 3 drives and 330 disc capacity, 6 drives and 630 disc capacity, and 9 drives and 900 disc capacity, making for a very cost effective machine to complete any DVD or CD duplication job.

## Features

- Unattended Operation
  - Standalone - No PC required
  - Batch Mode - Duplication of multiple masters
  - LCD screen in English and Spanish
  - Copy counter - Keeps track of copies made
