Immediate Release

October 27, 2010

Computer Modules, Inc. Changes Name of QZEO division to ImageOps

San Diego, California – Computer Modules, Inc., of San Diego announced today that they have changed the name of the imaging division from QZEO to ImageOps.

“Our new name better reflects the division’s recent strong focus on imaging,” said Ray Asturias, Sales Engineer for ImageOps. “With the growth of both our imaging customer base and the number of pure imaging products we offer, we are changing to a name that better communicates what our division does.”

ImageOps distributes electronic products and systems to companies in the industrial video, aerospace, biotechnology, microscopy, military, and semiconductor industries. The extensive product line-up offered by ImageOps includes industrial cameras, high-speed motion analysis systems, imaging software, professional video and audio equipment, and video displays and monitors. ImageOps distributes products from over 50 leading manufacturers – including Advanced Illumination, Communications Specialties, Euresys, Hitachi, JVC, Mikrotrotron, RGB Spectrum, and Sony.

ImageOps is a trademark of Computer Modules, Inc.

All other trademarks and registered trademarks are the properties of their respective owners.

About CMI and ImageOps (formerly QZEO)

CMI, founded in 1982, is a privately held company headquartered in San Diego, California. ImageOps, the reseller division of Computer Modules, Inc., is a distributor of electronic products and systems to companies in industrial video, aerospace, biotechnology, microscopy, military, and semiconductors. In addition, the Company provides software creation services, product design services, technical support, product integration, product support, and training services. This division also sells its own OEM camera and software products that are custom manufactured for it by third parties to original equipment manufacturing (OEMs) and end users. ImageOps sells to companies throughout the world.
